

# Shaping the future

## Engineer: Mining (Dispatch)

An exciting opportunity exists for an Engineer: Mining (Dispatch) reporting to the Superintendent Ore Supply. This role is responsible for ensuring that mining processes are optimised while ensuring achievement of production targets.

### Key performance areas

- Adheres to all health, safety and environmental (HSE) policies and procedures;
- System administration of the Modular DISPATCH system;
- Compiling of the daily crusher feed directives;
- Execute continuous MM&C improvement projects;
- Ensure that the various modules in Dispatch are functioning and are utilised to steer decision making processes in the open pit;
- Ensure that system updates and system infrastructure is maintained and improved;
- Presents propositions for new technology development, technological efficiency of products;
- Train and mentor MM&C Shift Controller and Dispatchers on proficiency of Dispatch;
- Initiate cost saving ideas aimed at reducing overall area, and mine costs; and
- Continuously search for and introduce new technologies to either lower the overall unit cost or improve the safety of the operation.

### Minimum requirements

- Grade 12 and a recognised Bachelor's/B Tech degree in Mining Engineering, plus two years relevant open pit mining experience, or
- Grade 12 and a recognised National Higher Diploma in Mining Engineering, plus ten years relevant open pit mining experience.
- Blasting Ticket;
- Code B (08) driver's licence.
