STAKEHOLDER REVIEW OF THE SEIA REPORT FOR RÖSSING URANIUM'S PROPOSED DESALINATION PLANT

Rössing Uranium Limited (Rössing Uranium) proposes to construct and operate a new desalination plant approximately 6 km north of Swakopmund, at the existing Swakopmund Salt Works.

Rössing Uranium appointed SLR Environmental Consulting (Namibia) (Pty) Ltd (SLR) and AURECON Namibia (Pty) Ltd (AURECON) to jointly manage the Social and Environmental Impact Assessment (SEIA) process for the proposed project.

The SEIA scoping phase has been completed where after various specialist investigations were conducted.

Subsequently, SLR & Aurecon prepared a SEIA Report, presenting the findings of the specialist investigations; as well as a Social and Environmental Management Plan (SEMP) that is now available for review by interested and affected parties (I&APs).

Description/nature of proposed activities

The project will comprise the following components that are described in more detail in the SEIA Report:

- * Seawater intake system;
- * Seawater pre-treatment system;
- * Desalination plant;
- * Ancillary structures and infrastructure;
- * Electrical supply system;
- * Product water system and pipeline; and
- * Effluent treatment and disposal system.

Availability of the SEIA Report and SEMP for review

A hard copy of the SEIA documents is available at the following places:

- * Swakopmund Public Library
- * Arandis Public Library
- * Walvis Bay Public Library
- * National Library in Windhoek

The report can also be downloaded from the following websites:

- * www.aurecongroup.co.za/en/public-participation.aspx
- * www.rossing.com

Alternatively, CD's containing electronic copies of the SEIA Report and all of its supporting documents are available on request to SLR and/or Aurecon.
