

## Expression of Interest

### **HORIZONTAL BELT FILTER (HBF) PILOT & FULL-SCALE PLANT WITH SIX FILTERS**

As part of the Feasibility Study, RUL are planning to install a 1/20 scale Pilot Plant (approximately 36m<sup>2</sup>) to firm up the design criteria for the full-scale plant envisaged to comprise 6 filter units of around 145m<sup>2</sup> each. This Tender is for the combined scope of the Pilot Plant plus the full-scale plant (envisaged 6 filters).

Post conclusion of the Pilot phase (3 to 6 months post commissioning), a decision will be made whether to proceed with the full-scale plant. The selected supplier who supplies and successfully supports the Pilot phase will be regarded as the preferred vendor for the full-scale plant.

Rössing Uranium Limited (RUL) is extending the life of mine of their Process Plant by a further ten years to 2036. With the age of the current facility more than 45 years, this provides the opportunity to upgrade key infrastructural components and to consider new processing technologies to the flowsheet to achieve process efficiencies.

This Tender will be run in three stages with the first stage being an Expression of Interest followed by a compulsory on-line clarification meeting. Following this session, all interested parties will be asked to submit an RFP (firm price and timeline for the pilot and full-scale plant scopes). This will be adjudicated for shortlisting to 3 vendors who will be sent a draft contract with commercial Terms and Conditions and invited for a site visit for final clarifications. After this an updated RFQ and Contract deviations will be requested for the final vendor selection.

The response required at this initial stage is an Expression of Interest only from recognized suppliers who wish to take part in the Tender Process.

- Expression of Interest Closure Date: 3<sup>rd</sup> April 2023 at 16:00 local time.
- Compulsory Clarification Meeting: 14<sup>th</sup> April 2023.
